

St. Mary Medical Center is looking for qualified paramedics to be part of an exciting new position. The Emergency Cardiac techs (ECTs) will work closely with the nursing department to help facilitate the flow of patients through the emergency department. This role will primarily focus on ensuring that patients who require Cardiac Catheterizations achieve a door to balloon time of less than 60mins. They will work in conjunction with the on call cardiac catheterization team to facilitate the rapid and safe transport of patients from the ER to the cath lab. Each candidate will also be responsible to perform other ED duties as necessary (IVs, blood draws, EKG's, etc.) when this primary job role is not needed. In addition we are looking for someone who can be a liaison between the EMS community and St. Mary Medical Center.

If you are interested in finding out more information about this exciting job opportunity please contact Courtney Burnett, Human Resources at 215-710-2513.
